11:06:06 From Jeremy Willette : Massive for sure!!

11:06:32 From David Cevoli : Hello from BFIS in Barcelona.

11:06:48 From Jeremy Willette : It's even a verb. Let's "Google" it = Let's look it up

11:07:18 From ktyo-dickerson : Or the way my son and all G6 say it: "SEARCH IT UP!"

11:07:36 From ktyo-dickerson : Google is the total assumption.

11:07:43 From ktyo-dickerson : Google = Search it up!

11:13:26 From Jeremy Willette : Love this idea, Chris! Thank you. I've used this protocol with discussing and unpacking articles or books, but not research ideas. This would be so good for exploring initial research topics!

11:13:27 From ktyo-dickerson : Final Word is a great differentiation strategy!

11:14:14 From Courtney Park : Love that graphic

11:14:30 From Sarah SIS To All Panelists : I was just thinking - I like the style of his slides

11:14:33 From Catherine Bae : Will presentation slides be available later? (for all presentations??)

11:15:05 From Courtney Park : @Catherine - yes! They are all on the on-demand site along with the videos

11:15:19 From Catherine Bae : Coolio. Thank you.

11:15:35 From ktyo-dickerson : This is where Kuhlthau's work helps... thoughts, actions, emotions in a continuum. Bringing me back to the Honeybee Project session, great connection to Chris' work here!

11:16:12 From Courtney Park : On Demand Site: <https://www.ecis.org/libraries-week/> (and check your email for the password)

11:17:01 From Catherine Bae : Thanks! Have been checking but thought I did not see slides. Saw chats etc. Shall check it out again later. Thanks again.

11:17:30 From Zakir.ICS Zurich : love MyBiB
11:18:02 From Cindy Colson : I love MyBib too. The possibility of having different projects and the extension button are wonderful
11:18:34 From Zakir.ICS Zurich : Chrome extensions link for MYBib <https://chrome.google.com/webstore/detail/mybib-free-citation-gener/phidhnbkbbkbnhldmpnacgicphkf>
11:19:03 From Sarah SIS To All Panelists : GOLD - Love this use of slides as a note taking template
11:19:08 From Peter Jacobson : NoodleTools does this too... :)
11:20:03 From Erin Wilson : Does Noodletools have a chrome extension? that would be AMAZING!
11:20:49 From Zakir.ICS Zurich : these days we are promoting Google Citation...
11:21:12 From ktyo-dickerson : @Erin, no, but NoodleTools has built in note taking, outline creation, exports as rough drafts...so, the extension isn't so imp't in the grade scheme of things. Evaluation and creativity is the goal.
11:21:21 From ktyo-dickerson : And no ads in NoodleTools. ;-)
11:21:45 From Peter Jacobson : NoodleTools is it's own research platform... more than a citation maker... but most only use that part of it... NoodleTools integrates very well with most databases as well... and GoogleDocs...
11:21:45 From ktyo-dickerson : Grand scheme, not grade scheme lol...
11:23:33 From Jeremy Willette : If Wikipedia comes up as your first search result, your topic is still too big. Great tip to pass onto students!
11:23:56 From Sarah SIS : Do you all still use Boolify? I love it so much
11:24:38 From Sarah SIS : <https://www.kidzsearch.com/boolify/>
11:24:44 From Sarah SIS : Puzzle-style google search

11:29:38 From Zakir.ICS Zurich : YES, Erin...I participated a Power searching with Google course directly from Google in 2013 with Dan Russell...it was fab
11:30:30 From Erin Wilson : "Imagine Your Perfect Source": Strategies for Cultivating Expert Researchers by Tasha Bergson-Michelson on edweb.net is one of my favorites!
11:31:02 From Zakir.ICS Zurich : I used to share Matt Cutt's Video to show them how Google works <https://www.youtube.com/watch?v=Md7K90FfJhg>
11:33:59 From Susan Merrick : Dan Russell's book, The Joy of Searching is also very good. Best to take the course on Edx first though.

11:43:40 From ktyo-dickerson : Very timely and part of our day to day.

11:44:34 From ktyo-dickerson : We have so much traffic with our databases, Google Scholar is useful for what it does well...it is always preferable to have full text.

11:44:54 From ckonkwo : Do you know of a similar presentation that could be used for teaching google search to elementary kids?

11:44:54 From Christopher Bell : Email: christob@isb.ac.th

11:44:55 From ktyo-dickerson : Right now CORE is our students favourite Open Access search.
